Payroll and retirement are closely linked, with payroll data feeding several retirement plan processes.

When the two are integrated with FuturePlan, there's less administrative work for you, less room for error, and less liability. As an integrated client, you no longer submit a year-end census, or submit contributions to investment providers or brokerage accounts. Data is sent where it belongs, without the need for the you to be involved.

Have you ever experienced or worried about one of these plan issues?

- Loan repayment errors
- Late deposits

- Incorrect sources on payroll files
- Per payroll match contribution calculation errors
- Plan contribution limit failures

- Hardship distribution errors

These errors, and others, are solved when you utilize FuturePlan experts for payroll and retirement services.
